**Subject:** [External] PSC Website Comments: Dominion's Solar Choice Tariffs

To Whom It May Concern:

Regarding Dominion Energy's new proposed Solar Choice Tariffs.

Dominion's Solar Choice Tariffs are completely unreasonable. Based on what I can see rooftop solar panel users will pay more for power with solar panels then if they didn't have them. Dominion is attempting to force all customers to abandon their rooftop solar power use to purchase more power from Dominion to recoup their losses from their SCEG purchase which they willfully entered into.

In my mind for the PSC to even consider Dominion's Solar Choice Tariff shows complete disregard for both SC residents and free market capitalism.

I would appreciate a response from the PSC as to why Dominion's Solar Choice Tariffs are even being considered for hearing based on the blatant disregard for SC residents evident in Dominion's Solar Choice Tariffs proposal.

Respectfully,

Daniel J Holmes
